MANUFACTURING
COMPLETE PROCESS ENGINEERING

Performance

cofaso is the leading high-end CAE solution for electrical engineering projecting tasks. The solution offers outstanding features for all industry-specific design and documentation requirements.

Global Presence

- cofaso is a world market product; your automation partner.
- cofaso solutions are available in 14 world languages.
- Supporting IEC, NFPA, and all global standards.

Success

- Thousands of electrical project engineers and designers in the world use cofaso to make real their ideas.
- cofaso software solutions guarantee compatibility of customer and supplier data.

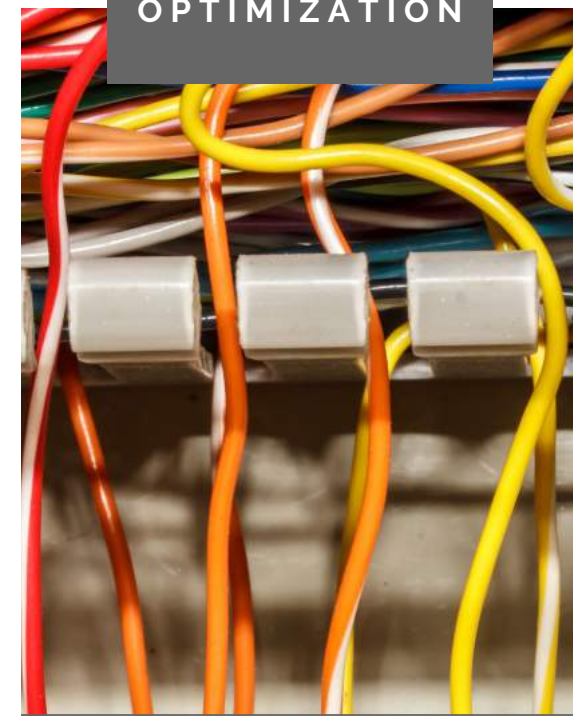

We increase your energy efficiency and productivity.

cofaso meets all criteria for complete authoring and editing of electrical engineering documents.

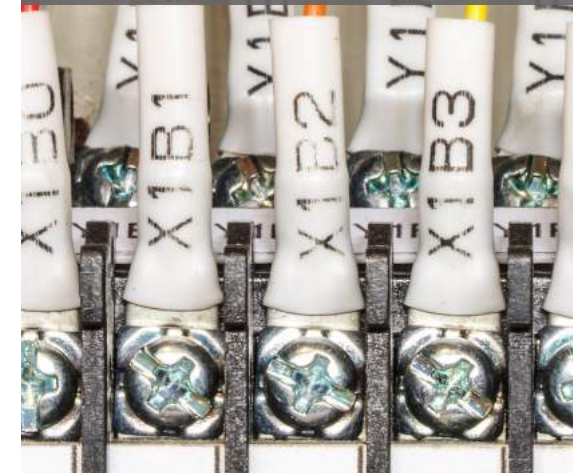

The evaluations conform to global standards. Now additionally take the opportunity to automate your document creation.

OPTIMIZATION

Optimize your plant's effectiveness.

HIGHLY AUTOMATED ELECTRICAL CABINET PRODUCTION

We offer the
technology to
improve your
capabilities.

WHY ECAD?

To be a successful electrical panel builder today you need the latest design environment. Design and documentation are very important that ensure you to identify and solve the problems before parts are ordered and production is planned.

WHY CHOOSE US?

We provide our industry knowledge and experience to help you sustain competitive in a constantly changing and developing industry landscape.

HIGH PERFORMANCE

With an effective design, all steps will be highly performed while building a panel, in single-line diagram, three-line diagrams, panel design, manufacturing connection plans and labeling processes and completely provide the preparation required to make the panel easy to build without an error. In subsequent processes, it will be ensured that faults are quickly eliminated for continuation of production.

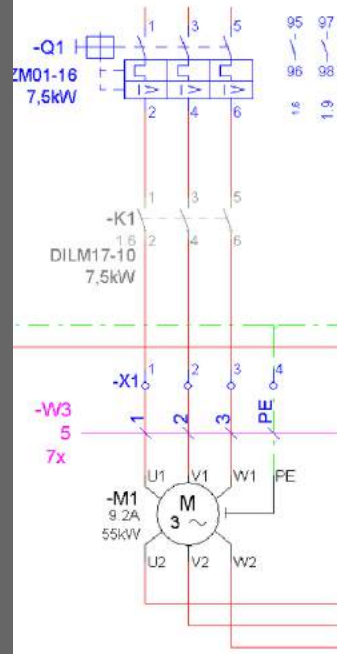

**PERFECT SOLUTION FOR
AUTOMATION!**

EFFECTIVE DESIGNING

Our electrical CAD library of all parts and macros supports you in lowering design effort for the entire process which is very complicated.

All trademarks are registered trademarks of their respective owners. cofaso™ provides the part libraries of all the above manufacturers. Macro libraries of only contracted manufacturers are provided in cofaso format by cofaso Software.

PRODUCTIVE CAE HANDLING

As a parameter-controlled system, cofaso provides users with consistent structuring of their work process, while offering unrestricted flexibility for individual adaption to department -project- or workplace-specific requirements.

BETTER DESIGN, BETTER PROCESS, BETTER RESULTS

ASSURED QUALITY

- User-friendliness
- Public and private cloud
- Flat 3D and full automatic panel design
- Full automatic schematic creation
- Interchange with other CAx systems (DWG, DXF, Eplan P8, XML)
- Prepared part libraries from all manufacturers
- Wide range of macro variants

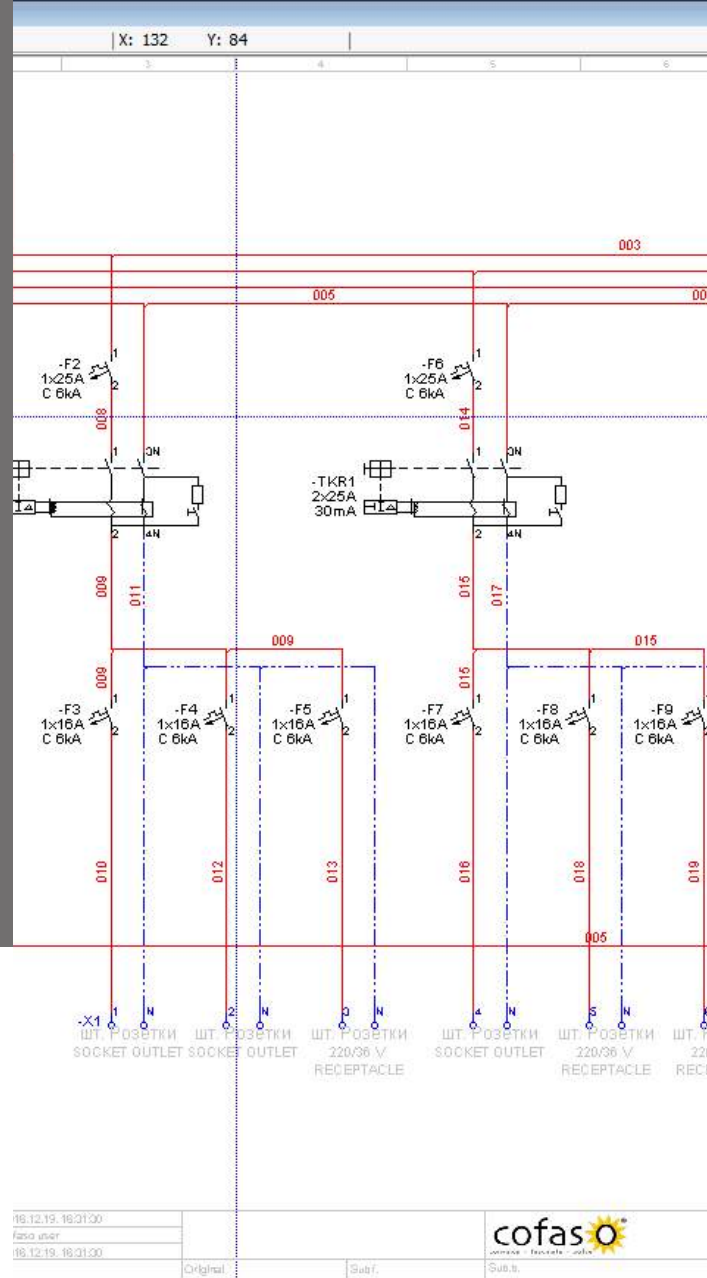

YOUR AUTOMATION PARTNER:
COFASO™

The right solution for every industry:

- Automotive
- Steel & Metal
- Energy
- Oil & Gas
- Food & Beverage
- Panel Building
- Machinery
- Pharmaceutical & Chemical
- Cement

We provide the fastest and the smartest electrical CAD/CAE solution which targets effective plant engineering and process automation.

ENGINEERING

Reduce your project and maintenance costs.

Our Goal

Our goal is to develop solutions for your current and future needs. By our developments we always use latest but proven technologies. Our innovations should work with your support and guarantee your success in the competition.

“
**MAKE IT
SIMPLE,
BUT
SIGNIFICANT**
”

COFASO PLATFORM
SOFTWARE SERVICE
CLOUD SERVICE
PARTS AND MACROS
PROCESS CONSULTING
7/24 SUPPORT
TRAINING

Our Clients

cofaso is a key player, through its international customers define the future of electrical engineering design and documentation.

We help our customers to compete globally.
